

The Strawberry Planter

Ref A57/S

A57 840mm high x 710mm
A57S 630mm high x 540mm

A fine 'gothic' feature for the entrance hall of a period house! Cast from a hand-carved oak original, this substantial planter provides a grand concealment for unsightly plant pots and boxes.

Its robust construction will support considerable weight, allowing a heavy soil container to be placed within. The planter may be used inside and out without detriment, being resilient in all weathers. The material used in manufacture is impervious to moisture, so neither splits or cracks, often a problem with wood equivalents.

Available hand-stained in a variety of wood finishes (limed oak finish illustrated), or ready for painting. (sizes approximate).
